## Objectives:

1. Highlight the work of industry leaders and philanthropists
2. Meet and engage with world leaders
3. Learn from industry stalwarts

## The event will focus on the EFFECT OF LEADERSHIP IN NATION BUILDING.

As our global society grows more complex and the need for greater economic and social opportunity is more pronounced, the role of philanthropy becomes even more important - and more nuanced. The days are long past when the field of philanthropy could pin its hopes solely on grant giving, and other means of providing direct service or support to those in need.

Charity has always mattered, and it still matters a great deal. But it's not enough, and it's not philanthropy.

At its core, charity is about meeting urgent needs. Philanthropy is about change. And to effect significant and lasting change, a philanthropic organization must be a leadership organization. It must set an agenda for change, and then work purposefully and consistently to produce results.

The commitment to a time-limited, quantitative goal is the first step in transitioning from a good grant-making organization to a true leadership organization. Establishing a single, ambitious goal that drives all of an organization's work compels transparency, emphasizes scale, mandates measurement, and encourages constant refinement and reassessment- all of which lead to systemic change.

This yearly event has always brought together industry leaders, corporate executives, professionals, entrepreneurs, startups, young leaders, change-makers, and organizations to share best practices, learn new skills and drive the change towards real diversity, equity, and inclusion.

## At the end of the summit you will be furnished with:

- The knowledge and tools needed to drive change in your community and workplace
- The insights and strategies required to transform leadership, as well as that of your organization
- New connections and friendships with globally-minded leaders that expand your network and lead to future collaborations
